

MG-Connection

Story board →

This is my first time to use After effect to finish an animation, and I was enjoying.

At the first stage, I was considering which stories I should use because I got two types, first was a idea of making eye drops advertisement, and the second one was combing my interest —rocks' energy and university, and I chose the second one because of the subject: connection, I thought this whole world was connect to university.

The process was quite suffering, I thought that was because I was still not used to this, and when I found out more effect I could play with, I felt more excited.
